CAREER OBJECTIVE

Aspiring **Junior Frontend Developer** with a strong foundation in **React.js, Next.js, JavaScript, TypeScript, Tailwind CSS, Node.js, Express.js** and **MongoDB**, built through developing and deploying multiple full-stack applications. Looking to join a product-driven team where I can contribute to building responsive, user-friendly interfaces and grow into a well-rounded software engineer.

SKILLS

Languages: JavaScript, TypeScript, C++

Frontend: React.js, Next.js, React Native (Expo), Tailwind CSS, HTML5, CSS3

Backend & Database: Node.js, Express.js, MongoDB, Firebase, JWT Authentication, REST APIs

Tools: Git, GitHub, Vercel

Interpersonal: Team Collaboration, Problem-Solving, Communication, Time Management

PROJECTS

HavenSpace — Property Rental & Booking Platform

Technologies: React, Node.js, Express.js, MongoDB, JWT, Firebase, Stripe, Recharts

A full-stack rental marketplace connecting tenants, property owners, and admins with verified listings, secure bookings, and integrated payments.

- Role-based access control (Tenant, Owner, Admin) with JWT authentication and Firebase Google social login.
- End-to-end booking flow with Stripe checkout, owner approval workflow, and multi-field search, filtering, and server-side pagination.
- Owner analytics dashboard with 12-month earnings charts (Recharts) and downloadable PDF reports, plus an admin moderation panel.

StudyNook — Library Study Room Booking System

Technologies: React, Node.js, Express.js, MongoDB, JWT, Firebase

A full-stack web app for students to browse, list, and book private study rooms in university libraries, with automatic conflict checking.

- Conflict-free scheduling engine that prevents double bookings by checking overlapping time slots on the server.
- Full CRUD room listing management with personal dashboards (My Listings, My Bookings) and a dark/light theme toggle.
- Secure authentication with JWT stored in HTTP-only cookies, plus email/password and Firebase Google sign-in.
